

COMPANY PROFILE

ABOUT US

Siba-Univest is an emergent fully empowered, diversified provider of contract services to the resources and infrastructure sectors in South Africa, with extensive operational capacity in Mpumalanga, Northern Cape, and the Free State.

Since our inception in 2012, then Siba-Sibe and Now **Siba-Univest**, we have continued to diversify our service offering and expanded our geographical presence. Our services encompass civil expertise including bulk earthworks and concrete installation, contract mining, drill, and blasting.

Our operational structure is categorised into civil, mining, minerals, energy & technologies and drilling & blasting, from early planning, design, development, construction to operations and maintenance. Our theory of work is integral to our vision, which allows us to deliver our services to standards above industry expectations and to constantly challenge ourselves to drive continuous improvement in **employee development and safety**.

Our flexible delivery model encompasses modern relationship contracting approaches including alliancing and early contractor involvement, joint ventures, construct-only, design and construct, as well as the more traditional model of undertaking works on a schedule of rates or day works basis.

OUR SERVICES

TIER ONE CONTRACTOR

Siba-Univest Civil, Mining, Drilling and Blasting services are geared to be a preferred service provider in the South African resources and infrastructure sectors. Our services are delivered to the highest of standards and quality.

SUSTAINABILITY STATEMENT

We believe in applying and supporting sustainable business solutions and practices that create real and lasting value for our stakeholders and society as a emergent provider of diversified contract services to the resources and infrastructure sectors and we recognise that responsible environmental and social management in these sectors plays a significant role in ensuring sustainable outcomes for the business and the planet.

We are committed to contributing to a sustainable future through responsible business practices that deliver economic returns for our shareholders, provide employees with a safe and inclusive workplace, creates value for the communities in which we operate and respects the environment. How we achieve this objective will evolve through active engagement in innovation, progressive industry 'best practice' and government direction and legislation.

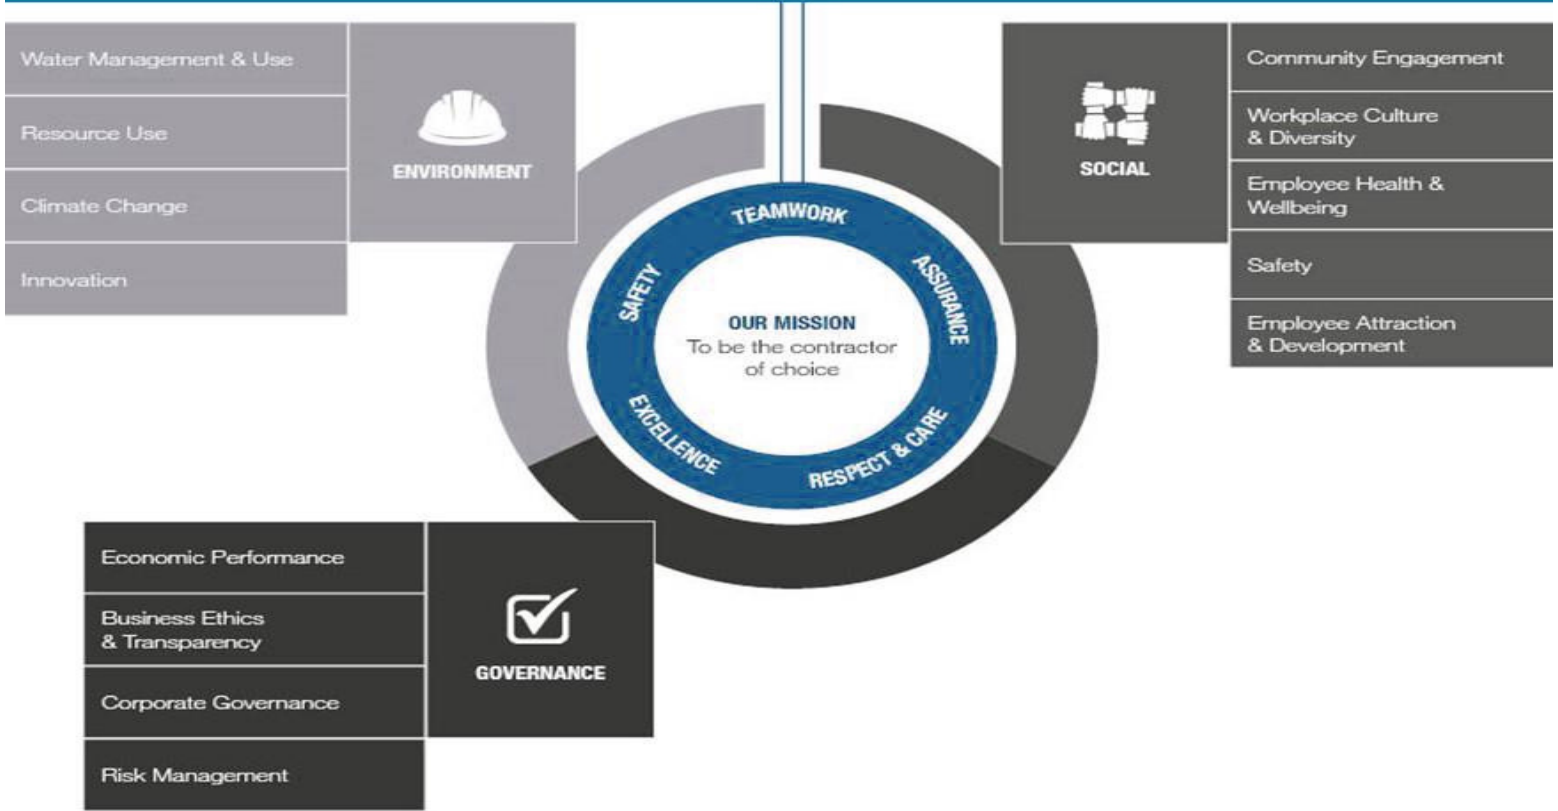

Although we do not own the resources or infrastructure projects on which we operate, we are committed to supporting, and where appropriate, partnering with our clients to enhance their sustainability objectives. These objectives include **employment targets** that align to community and industry expectations such as diversity, safety benchmarks, adherence to environmental standards and climate-related initiatives to reduce or limit greenhouse gas emissions whilst on site. Within the facilities that we do manage, including workshops and offices, we are committed to addressing the environmental and social impacts of these operations in a sustainable manner.

OUR GOVERNANCE FRAMEWORK

SIBA UNIVEST SUSTAINABILITY OBJECTIVE

We believe in applying and supporting sustainable business solutions and practices that create real and lasting value for our stakeholders and society.
